. Overview: Investigating the Tree of Life.
Evolutionary biology is about both process and history. The processes of evolution are natural selection and other mechanisms that change the genetic composition of populations and can lead to the evolution of new species.

Chapter 26: Phylogeny and the Tree of Life

25. To allow the production of one net G3P, the Calvin cycle must be turned three times. Each turn will require a starting molecule of ribulose biphosphate, a five-carbon compound. This means we start with 15 carbons distributed in three RuBPs. After fixing three carbon dioxides using the enzyme rubisco, the Calvin cycle forms
