This open access book covers all facets of entity-oriented search—where “search” can be interpreted in the broadest sense of information access—from a unified point of view, and provides a coherent and comprehensive overview of the

Download Ebook Dcg 4 Medias Dunod

state of the art. It represents the first synthesis of research in this broad and rapidly developing area. Selected topics are discussed in-depth, the goal being to establish fundamental techniques and methods as a basis for future research and

Download Ebook Dcg 4 Medias Dunod

development. Additional topics are treated at a survey level only, containing numerous pointers to the relevant literature. A roadmap for future research, based on open issues and challenges identified along the way, rounds out the book. The book is divided

Download Ebook Dcg 4 Medias Dunod

into three main parts, sandwiched between introductory and concluding chapters. The first two chapters introduce readers to the basic concepts, provide an overview of entity-oriented search tasks, and present the various types and sources of data

Download Ebook Dcg 4 Medias Dunod

that will be used throughout the book. Part I deals with the core task of entity ranking: given a textual query, possibly enriched with additional elements or structural hints, return a ranked list of entities. This core task is examined in a number of different

Download Ebook Dcg 4 Medias Dunod

variants, using both structured and unstructured data collections, and numerous query formulations. In turn, Part II is devoted to the role of entities in bridging unstructured and structured data. Part III explores how entities can enable search

Download Ebook Dcg 4 Medias Dunod

engines to understand the concepts, meaning, and intent behind the query that the user enters into the search box, and how they can provide rich and focused responses (as opposed to merely a list of documents)—a process known as semantic

search. The final chapter concludes the book by discussing the limitations of current approaches, and suggesting directions for future research. Researchers and graduate students are the primary target audience of this book. A general

Most of this book was written before October 1973. Thus the statements concerning the energy crisis are now dated, but

Download Ebook Dcg 4 Medias Dunod

remain valid nevertheless. However, the term "energy crisis" is no longer the unusual new concept it was when the material was written; it is, rather, a commonplace expression for a condition with which we are all only too familiar. The purpose of

Download Ebook Dcg 4 Medias Dunod

this book is to point out that the science and technology of laser-induced nuclear fusion are an extraordinary subject, which in some way not yet completely clear can solve the problem of gaining a pollution-free and really inexhaustible supply of

Download Ebook Dcg 4 Medias Dunod

inexpensive energy from the heavy hydrogen (deuterium) atoms found in all terrestrial waters. The concept is very obvious and very simple: To heat solid deuterium or mixtures of deuterium and tritium (superheavy hydrogen) by laser

Download Ebook Dcg 4 Medias Dunod

pulses so rapidly that despite the resulting expansion and cooling there still take place so many nuclear fusion reactions that the energy produced is greater than the laser energy that had to be applied. Compression of the plasma by the laser radiation

Download Ebook Dcg 4 Medias Dunod

itself is a more sophisticated refinement of the process, but one which at the present stage of laser technology is needed for the rapid realization of a laser-fusion reactor for power generation. This concept of compression can also be applied

Download Ebook Dcg 4 Medias Dunod

to the development of completely safe reactors with controlled microexplosions of laser-compressed fissionable materials such as uranium and even boron, which fission completely safely into nonradioactive helium atoms.
