Web Analytics is becoming increasingly important to online marketers, as they seek to track return on investment, and optimize their websites. We'll learn about Google Analytics, starting with creating a blog, and monitoring the number of people who see the blog posts and where they come from. -- (OUTLINE) CH1 - Overview: This chapter takes a look at what analytics is, and introduces related concepts CH2 - Blogalytics: a basic recipe to get started in analytics, to take the first step in being able to track web traffic and see what they're up to. We'll create a simple blog, start a Google Analytics account, and connect the two, and discuss things along the way. The goal is to make a simple, relevant way to start exploring analytics. CH3 - Getting Traffic for Analytics: In this chapter we're going to look at a couple basic techniques to generate traffic for a blog or website, following on our previous chapter about creating a blog. The purpose of these chapters is to be a self-contained experiment. Ultimately you need traffic in order to be able to look at analytics, so this chapter has a few ways to generate traffic. CH 4 - Reviewing Performance of Campaigns: In this chapter, we're going to take a light look at some of the ways you can see information about the performance of a website or campaign, as well as some related terms, and the idea of ongoing reporting. CH5 - Fun with eCommerce Analytics Part I - Shopify: Tracking ROI is a 50 billion dollar skill, because it's at the core of Google's success, and you could argue it's a trillion dollar skill, because of how much revenue Google helps businesses to make. In this chapter we're going to look at how to set up a Shopify account, which is one of the easiest ways to set up a "real" eCommerce system to learn about tracking ROI with analytics. I think it's important to see how you can set things up so that when you make an ad, you can track exactly how much money you are making. CH6 - Fun with eCommerce Analytics Part II - Adwords: This is part 2 of a 2 chapter series, whose goal is to capture the "full life cycle" of analytics, and take a close look at ROI (return on investment). The goal is to shed light on an elusive quarry - when you are spending money on ads, how can analytics help you know how much money you are making? And the exciting thing is that Adwords provides a way to do this. Shopify provides a foundation for ecommerce, and Adwords provides a way to advertise a site, and then track conversion. CH7 - Fun with eCommerce Analytics - Gumroad: In this chapter we're taking another look at ecommerce analytics, courtesy of Gumroad - a free, super easy to use platform. In some ways this chapter is a back-up to the previous two chapters, another way to learn about analytics in a live setting. CH8 - Exploring Google Analytics Certification: In this chapter we're going to explore some of the opportunities that Google offers directly, in terms of learning material, and the Google Individual Qualification, which can be a nice thing to have on your website or resume.
