Jeremy Black focuses on British policy and strategy in the so-called 'long' eighteenth century, beginning with the Glorious Revolution of 1688 and ending with the battle of Waterloo in 1815. Chapter 7 provides a contextual debate on the relationship between policy and strategy, discussing the dynamics between strategy and dynasticism, the complexity of strategic culture, the character of British imperialism, and the concept of power, with the associated challenges of reach and overreach.

and changes, social and demographic structure and growth, and culture. It presents a lively picture of an era of intense change and growth.

The complete Short Oxford History of Europe (series editor, Professor TCW Blanning) will cover the history of Europe from Classical Greece to the present in ten volumes. In each, experts write to their strengths tackling the key issues including society, economy, religion, politics, and culture head-on in chapters that will be at once wide-ranging surveys and searching analyses. Each book is specifically designed with the non-specialist reader in mind; but the authority of the contributors and the vigour of the interpretations will make them necessary and challenging reading for fellow academics across a range of disciplines. Europe changed more rapidly and more radically during the nineteenth century than during any prior period. A population explosion, a communications revolution, mass literacy, secularisation, urbanisation, Imperialism - these were just a few of the many ways in which the lives of Europeans of every class were dramatically changed. It was the century when most of the ideologies of the modern world - liberalism, conservatism, nationalism, socialism, and racism - came of age. Yet in some respects, especially international relations, there was a surprising degree of continuity and harmony. In six pithy chapters experts on the political, international, social, economic, cultural, and imperial history of the period address and answer the big questions of the period.
