An Economic Answer to Terrorism: Re-Visiting De Soto's 'The Other Path'. After nearly two decades in print, the fundamental pillars of Peruvian economist and ex-political adviser Hernando de Soto's bestseller, The Other Path, continues to resonate with modern economic security affairs. His argument that over-bearing bureaucracy hinders developing economies' successes are channeled through 1980's Peru case studies that offer a further comparative perspective to modern crises.

Publisher Description

This study, first published in 1976, explores the theory and impact of economic growth.

If you think the current administration is mismanaging the economy straight towards disaster, you're not alone: so do two top economists from both sides of the political aisle. In *Seeds of Destruction*, former Bush chief White House economist R. Glenn Hubbard and well-known CNBC commentator Peter Navarro explain why current economic policy is a catastrophic failure. Then, they offer a comprehensive, bipartisan blueprint for reversing the decline of America's currency, manufacturing base, and standard of living -

setting the stage for the epic policy debates that will precede the 2010 elections. Hubbard and Navarro begin with a "checklist" of what it takes to be a prosperous, democratic nation - and show why Obama's policies (some of Bush's also) fail on every level. They explain why the activist Federal Reserve and Obama fiscal stimulus policies are doing far more harm than good... why we must restore the U.S. manufacturing base, whatever China says about it... how to transform tax policy into an engine of growth and innovation... how to apply the "tough love" needed to save Social Security, Medicare, and Medicaid... why America must resign the job of world policeman... how market-based solutions can finally deliver real energy independence... how to reform our antique financial regulatory system without imposing heavy-handed rules that cause even more trouble.

This book compares and contrasts historical and contemporary Canadian and U.S. Native American policy. The contributors include economists, political scientists, and lawyers, who, despite analyzing a number of different groups in several eras, consistently take a political economy approach to the issues. Using this framework, the authors examine the evolution of property rights, from wildlife in pre-Columbian times and the potential for using property rights to resolve contemporary fish and wildlife issues, to the importance of customs and

culture to resource use decisions; the competition from states for Native American casino revenues; and the impact of sovereignty on economic development. In each case, the chapters present new data and new ways of thinking about old evidence. In addition to providing a framework for analysis and new data, this book suggests how Native American and First Nation policy might be reformed toward the end of sustainable economic development, cultural integrity, and self-determination. For these reasons, the book should be of interest to scholars, policy analysts, and students of Native American law, economics, and resource use, as well as those interested in the history of Native Americans and Canada's First Nations.

A penetrating look into the extreme plutocracy Vladimir Putin has created and its implications for Russia's future This insightful study explores how the economic system Vladimir Putin has developed in Russia works to consolidate control over the country. friends from the KGB, he has enriched his business friends from Saint Petersburg with preferential government deals. Thus, Putin has created a super wealthy and loyal plutocracy that owes its existence to authoritarianism. Much of this wealth has been hidden in offshore havens in the United States and the United Kingdom, where companies with anonymous owners and black money transfers are allowed to thrive. Though beneficial to a select few, this system has left Russia's economy in untenable stagnation, which Putin has tried to mask through military might.

"The hour of capitalism's greatest triumph," writes Hernando de Soto, "is, in the eyes of four-fifths of humanity, its hour of crisis." In *The Mystery of Capital*, the world-famous Peruvian economist takes up the question that, more than any other, is central to one of the most crucial problems the world faces today: Why do some countries succeed at capitalism while others fail? In strong opposition to the popular view that success is determined by cultural differences, de Soto finds that it actually has everything to do with the legal structure of property and property rights. Every developed nation in the world at one time went through the transformation from predominantly informal, extralegal ownership to a formal, unified legal property system. In the West we've forgotten that creating this system is also
