the names, lives, texts, and perspectives of women philosophers from the 6th Century BCE to the present. Karen Warren brings together 16 colleagues for a unique, groundbreaking study of Western philosophy which combines pairs of leading men and women philosophers over the past 2600 years, acknowledging and evaluating their contributions to foundational themes in philosophy, including epistemology, metaphysics, and ethics. Introductory essays, primary source readings, and commentaries comprise each chapter to offer a rich and accessible introduction to and evaluation of these vital philosophical contributions. A helpful appendix canvasses an extraordinary number of women philosophers for further discovery and study.

This book is the seminal work in which Solovyov developed his religious philosophy. In it, he undertakes a stunning critique of positivism, by which he understands the entire philosophy of Western rationalism, which he sees as setting up a conflict between reason and faith, and reason and nature. In the modern period, he finds abundant evidence for reason's war against nature in Western philosophy from Descartes to Hegel. "Positivism," the leading philosophy in his time, Solovyov also finds repugnant. In its place, he proposes his great theme of total unity--which was to become the dominant theme in Russian philosophy. This is the work that launched Russian religious philosophy and is a must for anyone interested in the subject. From the Esalen-Lindisfarne Library of Russian Philosophy.
